NetSOLO BROADBAND
THE FUTURE OF DISTRIBUTED **Audio**

Two Wires AND A HUNDRED STORIES

Imagine full network control, live voice instructions, and fire fighter telephone communications across a distributed network fire alarm system ... on a single pair of wires!

The power of **Distributed Audio** combined with **Digital Messaging** capabilities will allow fire and safety officials to evacuate your building effectively - and with maximum intelligibility.

FCI's NetSOLO® Broadband provides the most advanced features available in networked Life Safety Systems. Developed to meet the widest variety of applications using minimum equipment - NetSOLO® Broadband delivers on a platform of survivability, reliability, and flexibility.

Combining the INCC, INX and 7100 panels, on a simple network, enables NetSOLO® Broadband to remain cost effective in a wide variety of applications. Without the need for a redesign, existing 7100 panels are incorporated into the network and expanded as your application grows.

LIVE VOICE PAGING

MULTICHANNEL AUDIO

FIREFIGHTER PHONE

NETWORK CONTROL

FLEXIBILITY

- Up to 64 network nodes combining:
 - INCC - Intelligent Network Command Center
 - INX - Intelligent Network Transponder
 - 7100 - Analog Addressable Control Panel
- Network connection using either an unshielded, twisted pair or fiber optic cable
- Network functions including:
 - Fire alarm system control
 - Live voice paging
 - Fire fighter telephone signals
 - Advanced network-wide input/output control
- Powerful Boolean logic programming

SURVIVABILITY

- True peer-to-peer architecture
- Simple "Style 7" wiring
- Simple configuration of multiple Command Centers
- Each network node regenerates network communication

RELIABILITY

- Utilizes state-of-the-art Digital Signal Processor (DSP)
- INX combines a network interface and digital voice messaging
- INCC combines network interface, audio generation, annunciation & control of all points
- 7100 supports advanced detection

Broadband

NetSOLO BROADBAND

Distributed Audio

From the downtown

high-rise, to the

suburban shopping

mall, to a large

multiple building campus

setting, NetSOLO® is the

solution for challenging

applications. Whether using

standard wire or fiber optic cable,

you have the assurance of

unsurpassed reliability and

stability in your Life Safety

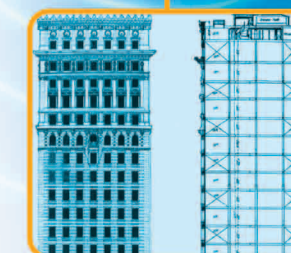

network. The future of

distributed audio in Life Safety

is NetSOLO® Broadband.

COURTESY BOSTON UNIVERSITY

Our Platinum Systems Distributors (PSDs) are a select group of FCI Engineered Systems Distributors. FCI and its' PSDs have teamed together to provide advanced fire alarm technology through quality products and superior support. Through their partnership with FCI, PSDs can offer you the most innovative products at a very competitive price. Our Premiere Systems Distributors will offer you the same quality and value FCI has stood for, for over 25 years.
